Committee: Regulatory Reform
Economic Development and Regulatory Reform

Date Introduced: July 10, 2007

Date of Summary: November 2, 2007

The bill amends the Occupational Code to permit currently registered cosmetology students to perform shampoo services on members of the public in a cosmetology establishment under certain conditions. The student must have completed 350 hours of instruction and met the academic requirements regarding courses in client safety, sanitation, bacteriology, hair and scalp disorders, scalp manipulations, and proper shampooing procedure. The cosmetology establishment employing the student is required to apply to the school for verification of current registration and completion of the required 350 hours of instruction. The school is required to verify these items and sign the application. The application expires on the student's expected graduation date. The cosmetology establishment is required to keep the records for at least 3 years after the employment relationship ends, allow the department access to the records, post the approved application, and not allow the student to perform other cosmetology services.
